

# Participate in Research!

## Who?

Pregnant moms and their infants up to 2 months

## What?

Participate in a fun study designed to measure infants' development using games, questionnaires, baby brain imaging, collecting infant fecal & your breast milk samples.

## Where?

You will participate at your home & Fralin Biomedical Research Institute (some future visits)

## Why?

To contribute to the understanding of the roles mother's behaviors and breast milk play in infants' brain and behavioral development!

You can support brain development for all babies by participating in research at the Howell MIND Lab!
