

PIONEERS IN BIOMEDICAL RESEARCH SEMINAR

Presented by the Fralin Biomedical Research Institute and co-sponsored by institute's Addiction Recovery Research Center and Center for Health Behaviors Research

RYAN VANDREY, Ph.D.

Professor

Department of Psychiatry and Behavioral Sciences
Johns Hopkins University School of Medicine

Human Laboratory Evaluation of Cannabis Products

This presentation will describe a series of experiments conducted at the Johns Hopkins Behavioral Pharmacology Research Unit. Healthy adult volunteers were administered acute doses of a variety of cannabis products that systematically differed with respect to dose, route of administration, formulation, and chemical composition. Results highlight significant differences with respect to abuse liability, impairment of functioning, and safety across the spectrum of retail cannabis products that exist in the U.S. today. Implications for changes in regulatory control are discussed within the context of proposed changes in federal law.
