

MAURY STRAUSS DISTINGUISHED PUBLIC LECTURE

Presented by the Fralin Biomedical Research Institute at VTC

JORDAN SMOLLER, M.D., Sc.D.

MGH Trustees Endowed Chair in Psychiatric Neuroscience
Professor of Psychiatry, Harvard Medical School
Professor of Epidemiology, T.H. Chan Harvard School of Public Health
Director, Psychiatric and Neurodevelopmental Genetics Unit
Massachusetts General Hospital

Bringing Precision Medicine to Psychiatry

Over the past decade, precision medicine has emerged as a new approach to disease treatment and prevention that aims to maximize effectiveness by accounting for individual variability in biology, environment, and lifestyle. This approach has had notable successes in oncology, cardiology, and other fields including the development of targeted therapies and novel tools for risk stratification and treatment matching. More recently, there has been growing interest in bringing the methods and tools of precision medicine to psychiatry. This presentation will introduce some of the goals of “precision psychiatry”, with a particular focus on leveraging large-scale data resources to address unmet needs in mental healthcare.

THURSDAY, APRIL 10, 2025, at 5:30 p.m.

(Reception and hors d'oeuvres at 5 p.m.)
Room M203, 2 Riverside Circle
