

# MAURY STRAUSS DISTINGUISHED PUBLIC LECTURE

Presented by the Fralin Biomedical Research Institute at VTC

## ZULFIQAR BHUTTA, Ph.D.

Robert Harding Inaugural Chair in Global Child Health  
Hospital for Sick Children  
Professor, Department of Paediatrics, Nutritional  
Sciences and Public Health  
University of Toronto

## *The Impact of Climate Change on Vulnerable Populations: What Can Be Done?*

Climate change and global warming are fast emerging as existential issues across the world, especially so among vulnerable populations in low- and middle-income countries (LMICs). This lecture will explore some of the current evidence on risk factors and impacts of climate change, especially heat on women and children, and potential intergenerational impacts. While efforts are made towards scaling up mitigation strategies, relatively less is known about opportunities for developing resilience and adaptation measures. Dr. Bhutta will review some of the emerging evidence related to community and population-based responses that might help address some of the current challenges among the poorest of the poor.

THURSDAY, APRIL 4, at 5:30 p.m.

(Reception and hors d'oeuvres at 5 p.m.)

Room M203, 2 Riverside Circle, or watch via Zoom: <https://FralinBioMed.info/DPL-Join>.
