

TIMOTHY A. JOHNSON MEDICAL SCHOLAR LECTURE SERIES

Presented by the Fralin Biomedical Research Institute at VTC and the Virginia Tech Carilion School of Medicine

EMILY MCGOWAN, M.D., Ph.D.

Associate Professor

Departments of Internal Medicine and Pediatrics

University of Virginia School of Medicine

In Person Lecture: Eosinophilic Esophagitis (EoE): Lessons Learned from Medicaid and the UVA EoE Cohort

Eosinophilic esophagitis (EoE) is an allergic condition that has rapidly transformed over the past 30 years from a case-reportable disease to a major cause of upper gastrointestinal morbidity in the United States. In this seminar, Dr. McGowan will first discuss the clinical presentation, epidemiology, and natural history of EoE. She will then review emerging data on how EoE may be underdiagnosed, especially in populations with limited access to care. Finally, she will discuss the potential role of immunoglobulin G4 (IgG4) in the pathogenesis of this disease.

FRIDAY, FEB. 9, at 1 p.m.

Room M203, 2 Riverside Circle.

Watch via Zoom at <https://fralinbiomed.info/MedScholar-Join>.
