

MAURY STRAUSS DISTINGUISHED PUBLIC LECTURE

Presented by the Fralin Biomedical Research Institute at VTC

TERESA LAMBE, Ph.D., OBE

Calleva Head of Vaccine Immunology
Professor of Vaccinology and Immunology
University of Oxford

Honorary Officer of the Order of the British Empire

Pandemics – The Lessons I've Learned

Teresa Lambe's research aims to improve human health by controlling disease — stopping epidemics before they become pandemics. She approaches this challenge through a one-health approach — mindful that animal and human health are delicately intertwined. Lambe is one of the principal investigators overseeing the Oxford/AstraZeneca COVID-19 vaccine, which has been distributed in more than 180 countries and has had a huge impact worldwide. Lambe is working with global collaborators to generate a "rule book" to help protect against several outbreak pathogens, routinely and rapidly moving approaches from bench to bedside to protect individuals against key respiratory and outbreak pathogens.

THURSDAY, NOV. 6, at 5:30 p.m.

(Reception and hors d'oeuvres at 5 p.m.)
Room M203, 2 Riverside Circle

Watch via Zoom: <https://FralinBioMed.info/DPL-Join>.
