

MAURY STRAUSS DISTINGUISHED PUBLIC LECTURE

Presented by the Fralin Biomedical Research Institute at VTC

ZIYAD AL-ALY, M.D., FASN

Chief of Research and Development Service
Director
Clinical Epidemiology Center
VA St. Louis Health Care Systems

In Person Lecture: Long Covid: the Lasting Legacy of the COVID-19 Pandemic

Even as the immediate crisis of the COVID-19 pandemic fades from public consciousness, its enduring consequences remain. Over 65 million individuals globally grapple with "Long Covid," the term that encapsulates the lingering health effects of the virus. Long Covid can affect nearly every organ system and impact people across the lifespan and across demographic and racial groups. Beyond the personal health impacts, Long Covid strains health systems, poses economic challenges, and threatens societal well-being. These far and wide reaching effects of Long Covid will likely reverberate for decades to come. This presentation will unpack the mysteries surrounding Long Covid and its profound impact.

THURSDAY, JAN. 25, at 5:30 p.m.

(Reception and hors d'oeuvres at 5 p.m.)

Room M203, 2 Riverside Circle

While masks are not required, they will be available at the lecture for those in attendance.
