

PIONEERS IN BIOMEDICAL RESEARCH SEMINAR

Presented by the Fralin Biomedical Research Institute at VTC and co-sponsored by the institute's Center for Human Neuroscience Research

In Person Seminar: Functional MRI of Dynamic Physiological States

Spontaneous fMRI signal fluctuations provide a valuable window into human brain functional organization. Recent work has also demonstrated the ability to extract information about dynamic internal states from fMRI. In this talk, Dr. Chang will discuss work on using multimodal imaging to detect and investigate ongoing changes in vigilance and autonomic physiology with fMRI.

CATHERINE CHANG, Ph.D.

Assistant Professor

Departments of Electrical and Computer Engineering,
Computer Science, and Biomedical Engineering
Vanderbilt University

FRIDAY, FEB. 24, at 11 a.m.

Room G101 A/B, 4 Riverside Circle, or watch live via Zoom at <https://FralinBioMed.info/PBR-Join>
