

# MAURY STRAUSS DISTINGUISHED PUBLIC LECTURE

Presented by the Fralin Biomedical Research Institute at VTC

## A. OVETA FULLER, Ph.D.

Associate Professor, Department of Microbiology and Immunology  
University of Michigan Medical School;

Director, African Studies Center, International Institute, College of  
Literature, Science, and the Arts; University of Michigan

## *Trusted Messenger Perspectives on Coronavirus, COVID-19 and Vaccines*

The emergence of a new member of the Coronavirus family, SARS-Coronavirus-2, has led to a highly impactful global pandemic of the disease COVID-19. This lecture will provide science-based insight into the knowns and unknowns of how virus infection leads to a range of outcomes, and on available preventions that include COVID-19 vaccines. Dr. Fuller will explore what is necessary to move to manage the COVID-19 pandemic to allow co-existing with this new viral pathogen.

THURSDAY, FEB. 25, 2021 at 5:30 p.m.

This virtual lecture will be webcast live at [fbri.vtc.vt.edu/live-webcast](https://fbri.vtc.vt.edu/live-webcast). Attendees can also register through our website to access a Zoom link for this presentation.
