

PIONEERS IN BIOMEDICAL RESEARCH SEMINAR

Presented by the Fralin Biomedical Research Institute at VTC and co-sponsored by the institute's Center for Human Neuroscience Research

YASMIN HURD, Ph.D.

Professor in the Department of Psychiatry, Neuroscience, and Pharmacology, and the Department of Systems Therapeutics, at the Icahn School of Medicine; and Director of the Addiction Institute at Mount Sinai

Unlocking the neurodevelopmental effects of cannabis and relevance to psychiatric risk

The sociopolitical landscape has dramatically changed regarding the medical and recreational use of cannabis. This talk will provide insights about advances made about the molecular underpinnings of developmental cannabis/THC exposure that maintains a long-term impact on adult behavior. The research describes translational and multidisciplinary scientific approaches ranging from molecular and epigenetic studies in animal models to investigations in human subjects.

FRIDAY, OCT. 23 at 11:00 a.m.

This seminar will be webcast live at fbri.vtc.vt.edu/events/live-webcast. In addition, students, faculty, and staff at Virginia Tech and Carilion Clinic who are invited to attend this lecture will receive Zoom access via email.
